Denver, CO 80202-2413

Dear Kelcey:

Please add Silver Creek to the list of sites in the PA/SI Activity under the MSCA. Dave Schaller and I discussed this addition briefly last week. I am not sure whether this site should be considered State-lead SI or SIF or State-management assistance SI or SIF -- or whether it really matters, except for EPA's own internal reporting. The State, EPA, ATSDR, Park City, and so far USGS all are contributing to work at the site. I trust that this kind of cooperation can be accommodated. We will track work hours spent on this site as we do with other PA and SI sites.

Please also forward the Report of Sampling Activities for each of the following EPA-lead sites: Provo Landfill, Iron-ton Complex, and Phillips Lower 40. We have received the Sampling Plans and Interpretation of Analytical results only for these sites. Please send the complete SI documentation (all sampling plans, activities reports, analytical interpretations) for the Richardson Flat site. We have received only the report of Air Sampling Activities.

Please let me know promptly if you have any questions or information regarding this request so that our activities are coordinated.

Sincerely,

Loretta Pickerell
Superfund, Program Manager
